November 2022

Greening the EntreComp Framework to Reconcile Economic Development and Environmental Security

Partner Meeting in Zagreb

We recently held our project meeting in Zagreb, Croatia from 26th to 27th of October 2022, which was kindly hosted by our Croatian partner **Callidus**.

On the first day, the partners presented and discussed the current status of the Green-4-Future project in general, including the overview of the learning outputs and the project website as well as the current status of the project in each partner organisation. Since the **IO1 – GreenEntreComp Framework** is already finished, partners focused on the **IO2 - Business Modelling for Circular Economy Businesses** and **IO3 - In-service**

Training for VET Tutors. Also, the **IO4 - Green-4-Future MOOC** was discussed and partners from Cyprus presented some enchantments. The second day was reserved for planning the **dissemination and exploitation** of the project, defining the project timeline, work plan and In-service training for VET tutors that will be held in University of Paderborn in Spring 202. Overall, it was a very insightful and productive partner meeting!

Current state of our development work..

We are proud to announce that the **GreenEntreComp** Framework, which is the first Intellectual Output, is completed. Now, the partners are working tirelessly on the **Business Modelling for Circular Economy Businesses** Toolkit breaking down the business processes underpinning 3 distinctive CE business models.

Next steps

Two **Transnational Training events for VET tutors** will be held in Germany in February and March 2023, in order to teach VET professionals how to implement the new framework into their practice and support businesses transition towards greener business practices using Circular Economy principles.
